

Masks

In keeping with the highest federal, state and county safety guidelines, masks are required indoors and outdoors on campus except while eating or drinking, regardless of vaccination status.

Vaccinations

All faculty and staff are fully vaccinated. According to the County guidelines, faculty and staff must either show proof of COVID-19 vaccination or get tested weekly.

Physical distancing

Recent guidelines at the federal, state and county level indicate that in-person instruction can occur safely without physical distancing when masks are used. Based on this guidance, physical distancing will be maintained when students and faculty are eating or drinking, but not in other areas of classroom instruction.

Testing

All students and faculty **MUST** complete a COVID-19 test before the start of school and twice monthly throughout the year. This means that, regardless of vaccination status, all teachers, students, faculty and anyone engaging in the teaching or instruction of our students will be required to follow our testing protocol.

The testing schedule for Fall 2021 is as follows: August 17, August 31, September 14, September 30, October 14, October 28, November 11, November 30 and December 14.

Ventilation

In 2020, our school and the entire Levy Family Campus upgraded its filters to Minimum Efficiency Reporting Value (MERV) 13. The system receives regular maintenance to ensure that it is properly maintained.

Hand hygiene

Hand sanitizer is readily available in classrooms, lunch areas, offices and at all entrances and exits. Students are encouraged to use the sanitizing stations throughout the school day. We also reinforce regular hand washing routines.

If you are sick, stay home

People with these symptoms may have COVID-19 and should stay home and contact Yavneh, at health@yavnehdayschool.org, and their health provider.

- Fever
- Cough
- Shortness of breath
- Fatigue
- Body aches
- Headache
